See Run the AutoCAD_2015_Gold_PATCHER_64_BIT.exe. Enter your product key. Click OK. This will allow you to extract the patch. Source Code This is the source code of the patch, as it is presented by the vendor. All source code is available for free. The patch will be available in the Autodesk Knowledge Base Method We must analyse the hex of the binary, and we will find the method to apply the patch, as specified in its file and in its execution method. Let's extract the patch, with WinRAR, into a new file. We will analyze it with HEX to find the method used. As it has a lot of data, it is better to get the hex of the file into a 4 gigabyte file, to have it quickly available. Also, it is best to use a 32 bit file, because of the different size of the 32 and 64 bits, and because of the possibility that 32 bits arch are not installed, and the patch will not be installed. First, we must find the method: We start by loading the patch, and putting it on a txt file. The patch is quite long, but this is only 469 lines. We choose the option to convert it to ASCII, and to extract it into another file. We can see that this file is in the ZIP format, and that this one is in the PK format. Let's load them both: We search for the method in the PK: Let's print the method in the PK: We replace the name of the method for its hex, which are only 32 bits: We save this file, and we move to the TXT: We find the method in the TXT: Let's replace the name of the method for its hex: Now we can print the entire source code, without the ID: Now we can save it into a file, and replace the ID in it: We save the file, and we try to install the patch. We find that the patch is incompatible with the current version. We find that the patch is for
